SUPERVISORY TRAINING PROGRAM

Unit 7: Accident Prevention and Loss Control

February 15, 2008, 8 a.m. to 5 p.m.

February 16, 2008, 8 a.m. to 3 p.m.

Felmley Dickerson Co. Training Room

803 E. Lafayette Street, Bloomington, IL 61701

STP is AGC's supervisory training program, designed specifically to meet the needs of the construction industry. Developed, updated and field-tested by and for contractors, the program consists of 10 courses that focus on knowledge and skills that every supervisor must have to be an effective manager of people, time, equipment and materials. STP courses are taught by an experienced local construction industry professional. STP is not a lecture course, but rather a participatory-based approach where participants draw from each other's experiences. AGC of America awards a Certificate of Program Completion to each person who completed all 10 STP courses.

STP Unit 7 covers the following topics:

- Introduction to Loss Control
- Safety Communication
- Documentation and Inventory
- Post Security and Traffic Control
- Selecting Methods and Equipment to Prevent Losses
- Using Reference Materials and Services
- Using the Schedule to Prevent Losses
- Government Regulations and Inspections
- Common Construction Hazards

Course Instructors

Doug Mahurin, Senior Loss Control Consultant, CCMSI, Inc., Danville
